DPF 510 ULTRA TACK

DPF 510 Ultra Tack offers secure adhesion for a wide variety of substrates and surfaces for your promotional signage needs. Perfect for store covering, construction graphics, barricades and tradeshow graphics. With DPF 510 Ultra Tack you can expect nothing but the best print quality in the market at a budget-friendly price point forming a permanent bond for lasting and vibrant impact. The two sided, lay-flat polycoated liner ensures that the vinyl will not curl under heavy heat from printers, is resistant to high humidity and makes your graphic easier to handle and install. Combine DPF 510 with Series 3510 overlaminates for an easier installation and abrasion resistance.
